Size Guide

For Navigator Frames

Choose the Fitovers® style that most closely matches the shape and size of your prescription eyeglasses. This will result in greater protection, increased comfort and a look that compliments the shape of your face, as well as the shape of your frame.

NOTE: You may want to enlist the help of a friend or family member to size your frame as the sizing involves removing your eyeglasses.

Simply print out this page and follow the three easy steps to find your 'perfect fit'.

- 1) Place your eyeglass frame, lens side down, on the diagram of your chosen style.
- 2) Your entire eyeglass frame, including any temple attachments, must fall within the box to ensure a perfect fit.
- 3) Refer to the online catalog for the available frame colors and lens options of your chosen style.

*In order for the Size Guide to print out in real size you must ensure your printer settings that relate to 'Fit to Page' are NOT SELECTED. These may include 'Shrink oversized pages to papersize' and 'Expand small pages to paper size'. **Printing in real size? Confirm with a Nickel.**

Small

Fits over frames
not exceeding;
5 1/8" x 1 3/4"
(131 x 43mm)
